IILM UNIVERSITY · GREATER NOIDA

INTERNSHIP PRESENTATION

Artificial Intelligence & Machine Learning

ASAD ALAM

B.Tech – Computer Science & Engineering
Roll No. 25SCS1003001356 | Semester 3 | Section 2CSE16
Batch 2025–2029

RabTech Academy · Remote · 30 Days
11 September 2026 – 11 October 2026

Internship at a glance

Organization

RabTech Academy
Remote internship · 30 days

Domain

Artificial Intelligence
& Machine Learning

Period

11 Sep 2026 – 11 Oct 2026
As printed on certificate

Student

ASAD ALAM
B.Tech CSE · IILM University, Greater Noida

Verified completion

6 of 6 tasks approved
Certificate issued: 19 September 2026

Problem statement

An effective ML workflow is a connected process—not just model selection.

Define responsibly

Frame the problem and document responsible data considerations.

Prepare & model

Engineer features, preprocess data, and develop supervised models.

Make inference usable

Explore deep-learning/NLP classification and a REST API inference capstone.

The six assessed tasks span these connected stages; no specific dataset or production use case is identified in the supplied certificate.

Internship objectives

01

Communicate the internship opportunity professionally on LinkedIn.

02

Frame an ML problem and prepare a responsible data card.

03

Understand feature engineering and preprocessing.

04

Explore supervised classification / regression and model tuning.

05

Address deep-learning / NLP text classification with PyTorch or TensorFlow.

06

Address real-time ML inference through a REST API capstone.

Technologies & assessed concepts

AI / ML

Artificial Intelligence
Machine Learning

Framework options

PyTorch / TensorFlow
(named in Task 5)

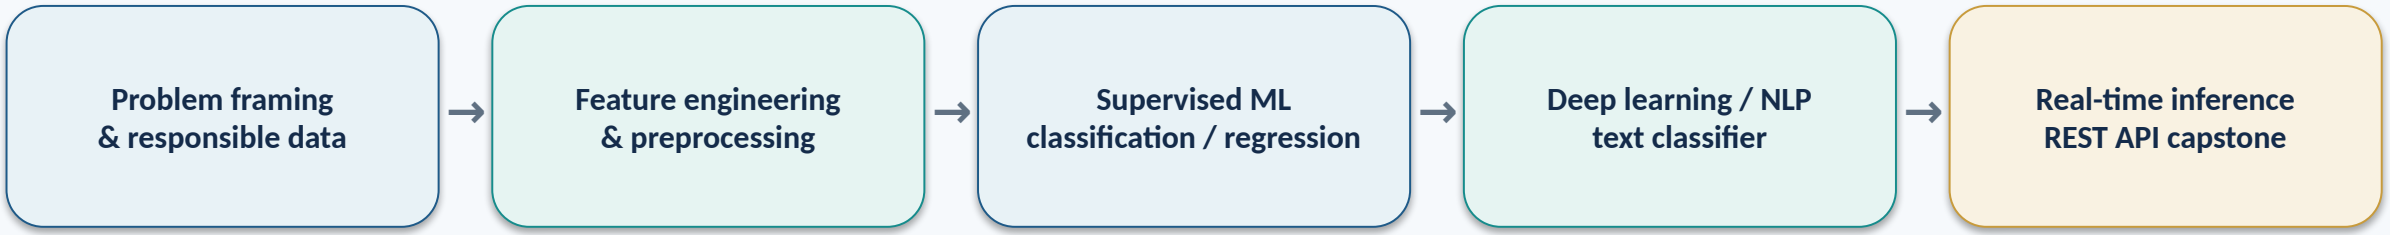

Inference interface

REST API
(named in Task 6)

Important documentation boundary

The certificate does not identify the selected framework, programming language, dataset, IDE, API framework, cloud platform, or exact model architecture. These are not assumed in this presentation.

Conceptual system architecture

Conceptual flow based on the task titles. It does not represent a verified deployed architecture or a specific implementation.

Methodology: six assessed tasks

01	LinkedIn internship offer	85/100 · A
02	ML problem framing & responsible data card	85/100 · A
03	Feature engineering & preprocessing pipeline	95/100 · A+
04	Supervised classification / regression & tuning	95/100 · A+
05	Deep learning / NLP text classifier	95/100 · A+
06	Real-time ML inference REST API & capstone	95/100 · A+

Task explanations · 01–03

01 · LinkedIn publication

Publish the AI & ML internship offer on LinkedIn.

Assessment: 85/100 · Grade A
Decision: APPROVED

02 · Problem framing

Frame an ML problem and prepare a responsible data card.

Assessment: 85/100 · Grade A
Decision: APPROVED

03 · Preprocessing

Feature engineering and preprocessing pipeline.

Assessment: 95/100 · Grade A+
Decision: APPROVED

Task explanations · 04–06

04 · Supervised modelling

Classification / regression modelling and tuning.

Assessment: 95/100 · Grade A+
Decision: APPROVED

05 · Deep learning / NLP

Text classifier task naming PyTorch/TensorFlow.

Assessment: 95/100 · Grade A+
Decision: APPROVED

06 · Inference API capstone

Real-time ML inference REST API and capstone.

Assessment: 95/100 · Grade A+
Decision: APPROVED

Evaluation results

92/100

OVERALL SCORE

A+

GRADE

6/6

TASKS APPROVED

Official result

OUTSTANDING · Mentor Verified · Reviewer: ADMIN-RABTECH-001

Learning outcomes

- ✓ Problem framing and responsible data documentation
- ✓ Feature engineering and data preprocessing concepts
- ✓ Supervised classification / regression and tuning
- ✓ Deep-learning and NLP text-classification exposure
- ✓ Role of REST APIs in real-time model inference
- ✓ Professional communication and assessed task completion

Learning outcomes are stated from the task descriptions; no unreported model metrics are claimed.

Certificate & verification details

Completion certificate

Name: ASAD ALAM
Domain: Artificial Intelligence & Machine Learning
Duration: 30 Days
Period: 11 Sep 2026 – 11 Oct 2026
Issued: 19 Sep 2026

Official identifiers

Certificate ID:
RAB-CERT-2026-30343B6A9C1C

Intern ID:
RAB-2026-0BBFE8CFBF

Issuer: RabTech Academy

The dates and identifiers above are reproduced as printed on the supplied certificate.

Conclusion

The RabTech Academy internship provided a structured, assessed sequence across core AI/ML activities—from problem framing and data preparation to modelling, NLP and inference API concepts.

Verified completion

All six tasks approved · Overall score 92/100 · Grade A+ · Result: Outstanding

The report and presentation document the verified record without assuming undocumented implementation details.

THANK YOU
